

## SMF IC600/SMF IC600+

The SMF IC600 combines advanced carbon media with superior ultrafiltration technology to guarantee the best filtration performance.

A high capacity filter with an excellent flow rate.

- Unique ultra-high porosity, catalytic carbon creates an extra large active surface area for removing contaminants.
- 100% binder-free, gas-activated carbon maximizes capacity for longer-lasting cartridges.
- Vortex flow combines turbo and radial flow to increase contact time, minimize pressure drop and fully utilize the media filtration capacity for maximum efficiency.
- Adsorptive technology consisting of 400 layers of proprietary nano-alumina fibers with electrostatic properties inhibits scale formation and reduces contaminants such as lead, VOC, bacteria (99.99%) and heavy metals.\*

### Specifications:

<b>Dimensions</b>	
<b>System (w x d x h)</b>	335 x 230 x 483 mm
<b>Weight</b>	4.5kg
<b>Flow</b>	
<b>Flow Rate</b>	18.9 litres/minute
<b>Production</b>	
<b>Filter Capacity</b>	189,271 litres
<b>System</b>	
<b>Temperature Range</b>	4 - 39 °C
<b>Pressure Range</b>	2.1 - 6.9 bar
